

**POWER:** Press this button to power on/off the device. When the "FILTER RESET" indicator turns red, replace the filter, press this button and hold 2 seconds to reset the filter program.

**SPEED:** There are 4 settings of air cleaning power. Press the button to switch between L(I),M(II),H(III) and Turbo speed.

**AUTO:** Press this button to enter AUTO mode. Unit automatically adjusts fan speed according to air quality tested by dust sensor.

**CHILD LOCK:** Press and hold this button 1 second to turn on/off child lock to lock all the settings. Press and hold to unlock.

**SLEEP:** Press this button to enter sleep mode. Fan speed runs on the lowest setting and all the indicator lights turn off. Press any buttons to wake up.

**TIMER:** Press this button to set a timer of 1,2...12 hours and "H" will light up to indicate a timer is on. To turn off a timer, press this button until the screen shows "- - -" and "H" is off.

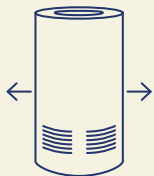

M I K O

## QUICK START GUIDE

**1**

Remove your new filter from its plastic bag and install into your IBUKI.

**2**

Place your IBUKI at least 1 foot from any walls or furniture for the best air flow.

**3**

Plug in the IBUKI and press the power button to "on" and start enjoying fresh, clean air.

See product demonstration video on MIKO website.
